Our Services

1. Modern Technology:

With us it is all about efficiency, speed, best equipment; it is about ensuring face-to-face communication, and empowering you by giving you what you thrive on with complete dedication of our team.

3. On time Project Completion:

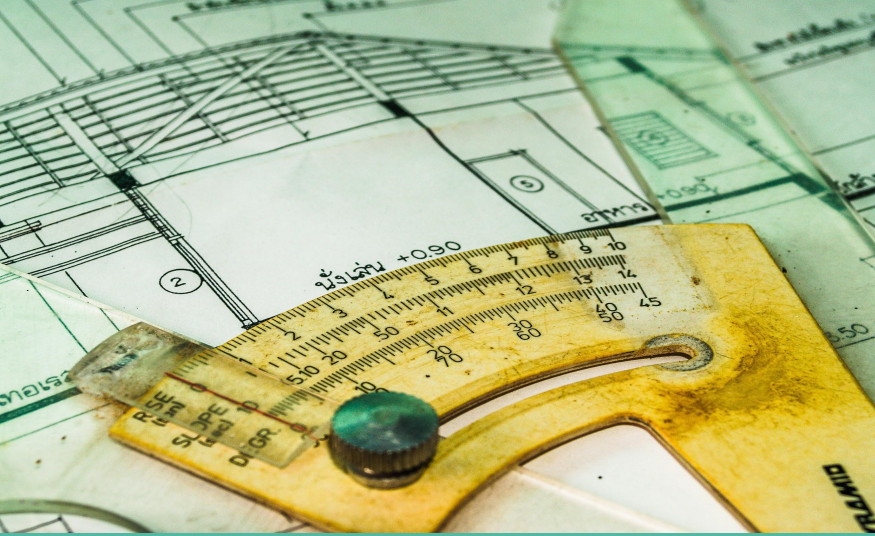

We respect the value of time in this ever dynamic scenario. Thereby, providing a promise of on time completion of your task so that your business does not lose out on flourishing.

1. Team of Expert Engineers:

Our team consists of professionals and engineering having vast knowledge and experience in distinctive industrial and mechanical fields.

4. Dedicated Support:

We are always there to listen to your requirements and we make sure to complete them at priority.

1. MEP

Our team of engineers analyzes the prime design as per your project requirements. We are quick with adaptations of technology and ensure to provide the best tools to cope with the demand of a modern day building. We manage a complete scope of Mechanical, Electrical, Plumbing installation, pre commissioning and commissioning all inclusive of design.

2. EPC

We integrate our knowledge with the dynamic technologies to offer our customers with the best services. Our team is completely flexible to work with as they adapt the project per your requirement. We not only aid our customers in development of the latest facilities but also assist them in application of the latest technology available in order to enhance the current one.

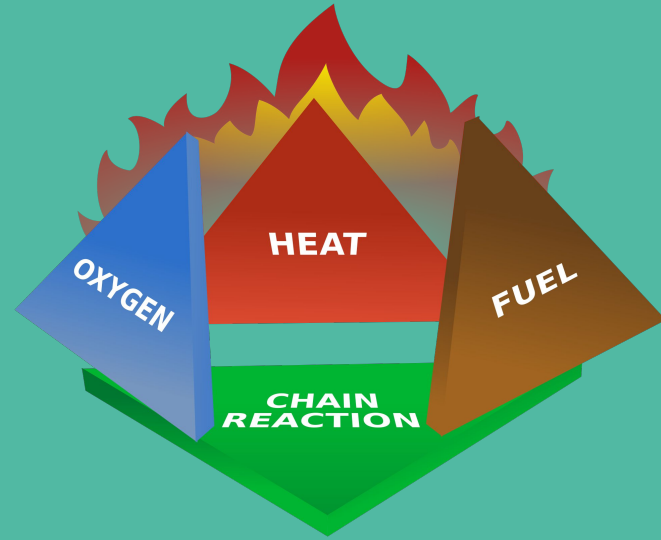

3. Small Construction Equipment

Accurate engineering, high quality raw materials and latest technology in machines with less fuel consumption & emission is navigating the current construction market. Size, features & capability of the equipment is the most important aspect which is fulfilled by us. We provide machinery equipment which is versatile for both highway repairs and maintenance projects.

4. Fire and Safety

Our team contributes to provide major factors in order to assure the safety of your ongoing project. We have provided Fire Protection, Fire detection and Security Solutions over the years of our operation in different sectors of the market by safeguarding people, property and authority.

5. HVAC

The significance of sustainable development has been growing throughout the years. Our team ensures to provide friendly HVAC systems which are authentic to assure Indoor Air Quality and habitation easement of new constructed buildings. Our professionals play an important role in Heat Load Calculations and HVAC designs and implementing them all in accordance with applicable international standards. We are also specialised in HVAC, Chiller, VRV, Cassette, Split and Window Ac units. We are providing installation, testing, pre-commissioning, commissioning and operation and maintenance.

6. Facilities Management

For commercial and industrial solutions, we provide extensive and unified services. In order to assure that your requirements are fulfilled, we customize as per your requirement. Our experts take complete ownership for Operational Excellence, Commercial Prudence and Sustainability. We are also providing complete solution of infrastructure management in commercial and residential fields like maintenance, housekeeping, horticulture etc .

7. Water and Process

We provide comprehensive and advanced solutions like Design and build pre engineered packages, installations, commissioning, supply of parts, plant operation and maintenance services for water and wastewater treatment plants.

8. Commissioning and Maintenance

Once the HVAC hardware is installed, Our team starts with the detailed examination of it. We verify whether the hardware is correct and whether or not the raw material is placed correctly at the adequate location. Post this, our team checks that whether the hardware meets the project requirements completely. We then provide a documentation handover about the hardware in detail.

9. Leasing Equipment

We are experienced and skilled in renting heavy, medium and light weight equipment. We have a centralized centre for maintenance which is carried by expert technicians who are skilled in maintenance of all kinds of equipment and we assure the best performance of all the equipment to provide a satisfied customer support to our clients.
